WHEN SPACE AND ECONOMICS MATTER

ZONARE

When Space and Economics Matter

Where space or economics is an issue, ZONARE has the perfect answer. Whether in a crowded emergency department, private office or interventional radiology suite, ZONARE's new ultrasound **miniCart** provides not only convenience but functionality as well. It is a customized, ergonomic mobile platform that holds and secures the **z.one** system's scan engine when space is tight and a cart is needed. Yet, it easily allows the scan engine to convert back to a premium compact system with a simple one-hand operation when the need to go portable arises.

From a full-size QWERTY keyboard, for easy annotation and patient data entry, to a flat panel monitor, there is nothing like it on the market today. Expanding from 41 inches at its lowest configuration (monitor down) to 61 inches at its highest (monitor up), the **miniCart** has a low profile footprint that can be pushed from the front or the back of the cart. Features include a security lock for the scan engine, independent four-wheel movement and a multifunction connector, or QuikConnect, enabling digital video and USB capabilities for connecting optional items like external printers and monitors or an Ethernet.

The **miniCart** integrates with the scan engine to provide a unique touch screen interface. The FastKey Menu on the scan engine offers a sophisticated set of "soft key" self-programmable menus which enable clinicians to quickly breeze through exams in a fraction of the time compared to conventional compact systems. Imagine the workflow efficiencies you can gain by accessing specific applications, such as OB/GYN, at just the touch of a soft button on the screen. Immediately, the menu reflects the application you have chosen.

Leading clinicians worked with ZONARE to develop the optimum solution to space and economic issues facing practices around the globe. As a result, while other compact ultrasound carts are designed to basically act as another piece of office furniture, ZONARE's **miniCart** is architected to provide a wealth of synergies in your practice environment.
